International Journal of Coal Geology 35 (1998) 381

International Journal of coal geology

Contents Volume 35, 1998

Preface 1

Coalbed methane: From hazard to resource
R.M. Flores 3
Instantaneous outbursts in underground coal mines: An overview and association with coal type
B.B. Beamish and P.J. Crosdale 27
Control of gas emissions in underground coal mines
K. Noack 57
Management of outburst in underground coal mines
R.D. Lama and J. Bodziony 83
Gas emission prediction and recovery in underground coal mines
L.W. Lunarzewski 117
Coalbed methane sorption related to coal composition
P.J. Crosdale, B.B. Beamish and M. Valix 147
Geochemistry of coalbed gas – A review
J.L. Clayton 159
Characteristics and origins of coal cleat: A review
S.E. Laubach, R.A. Marrett, J.E. Olson and A.R. Scott 175
Stratigraphy and structure of coalbed methane reservoirs in the United States: An overview
J.C. Pashin 209
Developmental geology of coalbed methane from shallow to deep in Rocky Mountain basins and in Cook Inlet–Matanuska basin, Alaska, U.S.A. and Canada
R.C. Johnson and R.M. Flores 241
Status of worldwide coal mine methane emissions and use
C.J. Bibler, J.S. Marshall and R.C. Pilcher 283
Measuring the gas content of coal: A review
W.P. Diamond and S.J. Schatzel 311
Permeability of coals and characteristics of desorption tests: Implications for coalbed methane production
W.R. Bodden III and R. Ehrlich 333
Methodology of coalbed methane resource assessment
C.M. Boyer II and B. Qingzhao 349
Computer modeling and simulation of coalbed methane resources
G.B.C. Young 369
